

## INFORMATION FOR EXTERNAL WORKERS:

Starting from the 15<sup>th</sup> of October 2021 up to the end of the state of emergency (currently, 31st December 2021) to enter or remain in a workplace, workers are required to possess and exhibit the COVID-19 green certification (so-called green pass) in course of validity (Article 9-septies of Legislative Decree no. 52/2021, introduced by Legislative Decree no. 127/2021).

We remind you that the certification is issued following a negative vaccination, covid cure or test (rapid or molecular antigenic, the latter also on a salivary sample).

The green certification can be produced in paper or digital format and will be conducted directly by reading the QR Code affixed to it: the employer has no alternative methods for checking (example through medical certificates attesting the execution of tests or vaccination).

Subjects exempted from the vaccination campaign on the basis of suitable medical certification are not obliged to possess or exhibit the green pass (Ministry of Health Circulars of 4 August 2021 and 5 August 2021). When entering the workplace, these subjects are required to exhibit, upon request, the relative certification.

The law sanctions the employer if he does not organize and does not carry out the checks and does not formally identify the persons in charge of them, and the worker if he does not possess and exhibit, on request, the green pass.

We inform you that, in case of non-possession control and / or presentation of a valid green pass, **the worker will not be able to access our premises or, in case of control inside, will have to leave them immediately.**

**We underline that, for all legal purposes, therefore, it will not be possible to accept the work and contractual performance.**

**Therefore, we invite you to want to ensure that the worker and guest will be in possession of a valid green pass at the time of access to the company.**
