

ASC DISTRIBUTION BOARD

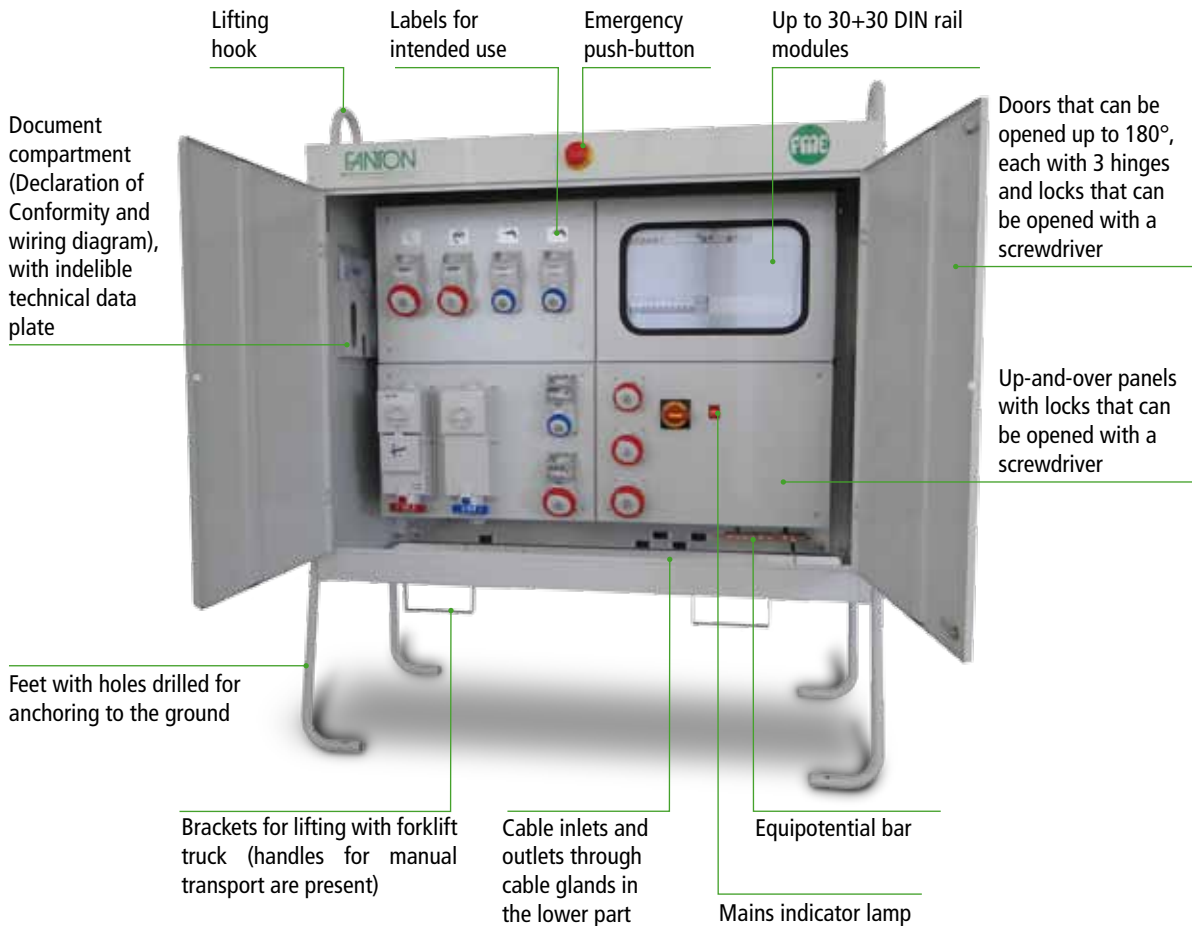

2-door version up to 400A, 1-door version up to 160A

Fanton presents a new series of ASC panels suited for specific use in medium and large building sites, in heavy industry, in farming and at all those sites where high impact, atmospheric agent and chemical resistance is required. The ASC panels have been type tested according to the CEI EN 60439-1 and CEI EN 60439-4 standards. They are made of powder coated galvanized sheet metal and have a very thick 25-mm diameter metal tubular support. Hot galvanization ensures maximum rust resistance, even if used in a wet environment, maximum stability and mechanical resistance.
